Transfer of setter trays into setter trolley

Setter trolley loader

Benefits

The fully automatic trolley loader completes the automatic egg handling process, substituting the heavy and repetitive manual labour of placing setter trays into trolleys. A smooth action prevents damage to the hatching eggs, while compact design requires minimal floor space.

How it works

- Setter trays are pushed onto an automatic trolley feed unit, which gently pushes each tray into the setter trolley
- The automatic feed unit returns, picks up the next tray and indexes automatically to the next loading height
- As loading is always positioned on one side of the trolley, batches remain unmixed
- The trolley remains fixed and static throughout the entire operation, to be replaced by an operator when full

Technical Specifications

Capacity	> 60,000 eggs per hour
Max. Power consumption	> 1.2 kW
Air requirement	> 15 ltr/min at 8 bar
Material	> Stainless steel AISI 304
Dimensions (WxDxH)	> 1200 x 1900 x 2500 mm
Weight	> 250 kg
Including	> Fixation system for trolleys
IP Marking	> IP65
