SmartPro™ Combi Incubator

Setting and hatching functions in one cabinet

Benefits

The SmartPro™ Combi Incubator has been designed to incorporate the features and advantages of Pas Reform's larger SmartPro™ incubation technologies, to meet the specific requirements of small, specialised hatcheries. The Combi offers controlled setting and hatching functions in one cabinet and can be used for various species, including hen, ostrich, duck, goose or turkey. Flexible in operation, the unit can be used solely as a setter, a hatcher or as a combination of both. Easily manoeuvrable when fitted with large swivel wheels, the SmartPro™ Combi Incubator is supplied pre-tested, ready to plug in and start incubating.

How it works

- The SmartPro™ Combi Incubator is constructed from heavy duty, waterproof panels and equipped with electronic temperature and humidity controls
- The machine incorporates a reliable, fully automatic, mechanical turning device which rotates the eggs through 90° at programmable time periods
- SmartTouch™ multi-language user interface design makes operation simple and easily accessible to operators of all skill levels
- The Combi is shipped fully assembled, and is simple to install and operate
