Chick box dolley

Benefits

Highly durable, heavy duty galvanised steel construction with large diameter swivel castors for easy manoeuvrability. Upwards adjustable central guiding tube locks to fix a stack of chick boxes securely onto the dolley. In its lowest position, the guiding tube is compact and easily movable when no boxes are placed onto the dolley. Easy to clean.

How it works

- The central guiding tube is placed in the upper position and fixed to pull a stack of boxes onto the dolley
- The guiding tube with top lock is lowered to stabilize and fix the stacks of boxes onto the dolley
- Once the boxes have been moved into their final position, the guiding bar is unlocked and the stacks of boxes can be unloaded from the dolley
