

Pas Reform Booster set

To reliably sustain a constant water pressure
for humidification systems

Royal Pas Reform
Integrated Hatchery Solutions

Booster set

Benefits

For use with Royal Pas Reform's incubator humidity nozzle system. Includes booster pump and expansion tank – to reliably sustain constant water pressure and reduce the need to stop/start the pump, resulting in longer equipment life. Supplied with control box and connection set. Stainless steel components suitable for reverse osmosis water (recommended).

How it works

- Incoming water is pressurized by a booster pump to the required pressure level
- Outgoing water pressure is stabilized by the use of a pressure tank
- Centralized water piping to the different rooms transports the pressurized water to the point of use

To reliably sustain a constant water pressure for humidification systems

Technical Specifications

Humidifying capacity	> 500 litres/hr
Operating pressure	> 10 bar
Electrical requirements	> 3x230V 50/60 Hz or 3x400V 50/60Hz +N+ PE
Power consumption	> 0.74 kW
Connection	> 1" internal threaded
