

Pas Reform SmartTray™ 150

For hen eggs

Open, spacious grid promotes the free movement of air
for more uniform heat and humidity distribution

Pas Reform
Hatchery Technologies

SmartTray™ 150

Benefits

Designed to cradle hatching eggs of any size safely, SmartTray's™ open construction is proven to deliver uniform airflow during incubation. This helps to create an optimal environment for the growing embryos, promoting day old chicks of the highest quality.

How it works

- Supports hatching eggs at two positions: suitable for large and small eggs, with specially shaped support points to fit all egg sizes
- Open, spacious grid: prevents the development of 'dead spots' in the incubator and allows free movement of air for the uniform distribution of heat and humidity
- Maximum protection for the egg: prevents hairline cracks - ideal for farm traying
- Stable, self-centring egg positioning: provides a stable, secure target for accurate in-ovo vaccination
- Ergonomic design: lightweight, smooth finish for comfortable, easy handling
- Built-in Microban® for the life of the product kills up to 99.9% of harmful bacteria on the tray surface

Improved setter tray design delivers greater comfort and uniform airflow
