Integrated Hatchery Solutions

# SmartTray™ 150

## Benefits

Designed to cradle hatching eggs of any size safely, SmartTray's™ open construction is proven to deliver uniform airflow during incubation. This helps to create an optimal environment for the growing embryos, promoting day old chicks of the highest quality.

## How it works

- Supports hatching eggs at two positions: suitable for large and small eggs, with specially shaped support points to fit all egg sizes
- Open, spacious grid: prevents the development of 'dead spots' in the incubator and allows free movement of air for the uniform distribution of heat and humidity
- Maximum protection for the egg: prevents hairline cracks - ideal for farm traying
- Stable, self-centring egg positioning: provides a stable, secure target for accurate in-ovo vaccination
- Ergonomic design: lightweight, smooth finish for comfortable, easy handling
- Built-in Microban® (optional) for the life of the product kills up to 99.9% of harmful bacteria on the tray surface

Improved setter tray design delivers greater comfort and uniform airflow
