

Pas Reform Gravity turning unit

To turn boxes and baskets for stacking and drying
after washing

Pas Reform
Hatchery Technologies

Gravity turning unit

Benefits

After washing, the gravity turning unit turns chick boxes or hatcher baskets 180 degrees for easy stacking and the effective removal of residual water. Optimises workflow between washing and subsequent operations. Robust, stainless steel construction.

How it works

- Baskets and boxes are washed upside down, to ensure maximum cleaning efficacy inside and out
- The unit is positioned at the end of the washing machine to receive washed boxes and baskets
- Clean boxes are turned 180 degrees and placed on the conveyor for stacking

Turning chick boxes or hatcher baskets
180 degrees
