Conveyors

Benefits

Roller conveyor - This gravity system roller conveyor is suitable for transporting various trays or baskets. Easily maintained and suitable for high pressure cleaning. Stainless steel construction with durable plastic rollers.

Belt conveyor - Suitable for straight line configurations and for angled transport. Easy to clean stainless steel construction with high quality transport belts.

Selection & grading conveyor - Extra wide belt conveyor for visual quality control and the selection of day old chicks after separation and prior to further handling.

Chick conveyor - Designed for the gentle transport of day old chicks to reduce stress between various (automation) modules. Supplied with easy to clean belts and available in various lengths.

Chain conveyor - Available in different lengths the chain conveyors are ideal for transporting full or empty hatcher baskets and setter trays, as well as all kinds of chick boxes. Stainless steel design with optional stoppers and sensors for automated carrier transport. Fully compatible with various automation systems, including stackers and de-stackers.
